**Subject:** gas sampling protocol

Rich,  
I'm increasingly getting asked about the Dimock samples. My answer remains both "let's wait until all the data are in" and that "based on what I've seen so far, the results look consistent with what we found across the broader area."

A quick question for you. What sampling protocol are you using for your dissolved gas sampling? A few numbers may look a little unusual, but I need to take a closer look.

Rob
